MEMORANDUM

SUBJECT: Soviet Involvement in International Terrorism

1. The Intelligence Community is preparing a formal document on prospects for further anti-US terrorism, which will include examination of Soviet involvement. The most recent draft, which represents CIA consensus but has not been coordinated outside the Agency, makes the judgment that there is no persuasive evidence of a Soviet hand behind recent anti-US terrorist incidents. [REDACTED]

25X1

2. The appended CIA report, which was distributed on a close hold basis to State, Defense, and the NSC Staff, is the only CIA report alleging direct Soviet involvement in anti-American terrorism since the SNIE on this subject was issued last

25X1

3. The Agency is attempting to check further on this report
